

AN IMPACT-DRIVEN APPROACH TO RESEARCH AND INNOVATION

Key points to explore

It's important for RMIT to forge a focus that centres the **socially responsible research agenda we are known for** and helps guide how we pursue innovation and impact across the whole scope of RMIT's activities.

Making a commitment to **building multidisciplinary platforms for cross-portfolio work and learning**, and evolving RMIT's role as facilitator, broker and catalyst for impact through partnerships

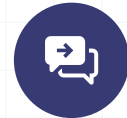

Our institutional frameworks should clarify the domains, outcomes and pathways that contribute to impact, enhanced by systems and measurements that support our talented researchers, workforce and communities

As an applied university with a reputation for collaboration with partners, there are many ways **RMIT can learn and scale our efforts.**

Showcase our leading researchers and share **our values, views and ideas to advocate** when community needs and debate surfaces and elevate our presence as a public leader.

Apply the processes, findings and skills arising from our research to our own organisation, benefiting organisational learning and development.

Top-level Summary

Empower talented researchers and extend our reputation for **partnership, co-creation and excellent applied research** to develop socially responsible research that helps meet systemic challenges. We will align and connect our strengths in teaching, research and engagement to pursue positive long term impact.

But wait, there's more!
